

Kögel FastSlider sliding tarpaulin system

Kögel FastSlider is a lightweight tarpaulin system that is easy to open and close.

Specially developed rollers ensure that the tarpaulin slides smoothly. At the top, the rollers are guided by an aluminium roof strap, which can be combined with a lifting roof. At the bottom, they are guided by a Nirosta guide rail, which is bolted to the side of the external frame. The tarpaulin then slides open in a smooth wave motion and folds compactly together. As a result, there is no more need to hold onto billowing tarpaulins or to clean dirty buckles.

The Kögel FastSlider system can be used on both sides or the left side, and can be adapted to numerous logistical requirements, such as for **automotive, beverage or pallet transport**.

KÖGEL

NOVUM: LIGHT & STRONG

KÖGEL FASTSLIDER

- ✓ Significant time saving
- ✓ Simple handling
- ✓ A wide range of variants

NOVUM – The new Kögel trailer generation
Profitably re-examined!

QUICKER, EASIER AND SAFER HANDLING DURING LOADING AND UNLOADING

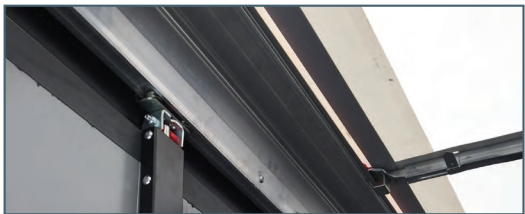

KÖGEL FASTSLIDER DETAILS

Quick-opening lever at the front
For quick opening and closing of the tarpaulin.

Top guide rail integrated in the roof strap

Optional: Load-securing for partial loads with beam
Load-securing for partial loads at the rear with two vertical and three horizontal beams. The vertical beams are secured to the roof rail and can be moved to the desired position. At full loads, these can be folded up and stowed away.

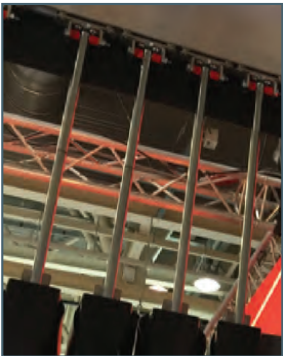

Ratchet as a quick-tensioning device at the rear
Proven Kögel system for opening at the rear.

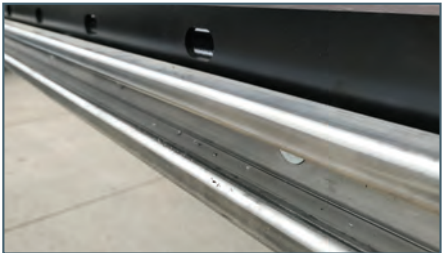

Different equipment for Kögel Mega
Ratchet at the front in place of quick-opening lever.

Different equipment for trailers with a lifting roof
Tension straps at the side. Telescopic micro stakes.

Lower guide rail
Solid Nirosta rail bolted to the external frame.

Pallet limiting rail
prevents the load from sliding into the side wall and thereby ensures it can still be opened.

Micro stakes
guide the rollers along the rail at the top and bottom. The plastic connectors between the micro stakes have been reliably used in Kögel Cargo, Mega and Light trailers for many years, and fold the tarpaulin into tidy, uniform sections on opening for a maximum opening window of 9.37 m at the side.
