KÖGEL TIPPING TRAILERS FOR YOUR SUCCESS

04 THE KÖGEL TIPPER TRAILER

06 THE KÖGEL ASPHALT TIPPER TRAILER

08 INDUSTRY SOLUTIONS

Be it in the construction industry, roadworks or waste disposal – KÖGEL tipping trailers are the perfect solution for the efficient transport of bulk materials. They are indispensable for the efficient, safe and economical transport of bulk materials. Our **TIPPER TRAILER and ASPHALT TIPPER TRAILER** stand out for their lightness, robustness and well-designed construction.

Thanks to their optimised vehicle weight, you benefit from a higher payload, lower fuel consumption and improved profitability. Their durable construction ensures maximum reliability and low maintenance costs. With KÖGEL, you opt for intelligent transport solutions that give you a real competitive advantage.

THE KÖGEL TIPPER TRAILER

SUCCESS FACTOR: LIGHTNESS

- MINIMAL WEIGHT
- OPTIMISED PAYLOAD
- HIGH STABILITY

Illustrations may show optional extra equipment. Products are subject to continuous technical modifications.

EQUIPMENT

Chassis frame

The newly developed chassis frame in a weight-optimised, lightweight construction is made of high-strength fine grain steel.

- Reinforced frame rear for optimal distribution of force while tipping

Tipper body

The welded tipper body offers dirt-repellent, straight surfaces with a low centre of gravity. Available in many combinations and to suit customer requirements.

- Floor: 4, 5, 6 mm (HB450)
- Side wall: 3, 4, 5, 6 mm (S700MC)
- 49° tipping angle

Load volume in m³

The load volumes are 24m³ or 27m³ – additional versions available.

Closed top flange

- Full-length welded side wall panel with top flange
- Dirt-repellent, clean, straight inner surface
- Easy to clean

Tailgate lock

The tailgate lock retracts fully into the tipper body during tipping to prevent damage.

KÖGEL ASPHALT TIPPER TRAILER

THE EXPERT FOR HOT ASPHALT

- IMPRESSIVE RESISTANCE
- APPLICATION-BASED
- HIGH SERVICEABILITY

Illustrations may show optional extra equipment. Products are subject to continuous technical modifications.

EQUIPMENT

Tipper body insulation

Water-repellent, temperature-resistant hard foam and sheet metal covering in a floating, low-maintenance design. (Individual elements are exchangeable).

Electric sliding roof

The optional sliding roof can be conveniently operated from the ground via remote control.

Pull-out access ladder

Secure access for viewing and boarding the tipper body. Includes interior access steps as standard.

Asphalt spreader (optional)

An additional opening in the back wall to dispense small, precisely measured quantities.

OUR SOLUTION FOR YOUR INDUSTRY:

Construction sites I Demolition I Bulk materials I Asphalt construction I Roadworks

PRODUCT OVERVIEW

	EXPLANATION	TIPPER TRAILER	ASPHALT TIPPER TRAILER
3-axle	Technically permissible axle-group load of 27,000 kg for maximum payload.	✓	✓
2-axle	Technically permissible axle-group load of 18,000 kg and a short wheelbase for lighter payloads and reduced tyre wear during manoeuvring.	✓	✓

Construction sites

The **KÖGEL TIPPER TRAILER** can be used to transport a wide variety of different materials. Be it soil, gravel or concrete rubble, its short agile wheelbase enables optimal manoeuvring on the construction site. The ideal combination of low tare weight and maximum load guarantees outstanding economic efficiency.

Demolition

The robust tipper body construction made of high-strength steel withstands even high impacts. Building waste, concrete rubble or steel girders can be transported without risk. The sturdy trailer frame and well-coordinated axle distribution ensure secure footing while tipping.

Roadworks

The **KÖGEL TIPPER TRAILER'S** high payload, and excellent manoeuvrability ensure efficient operation on the construction site. Its robust materials and well-designed construction not only guarantee a long lifespan, but high profitability.

Asphalt construction

The well well-insulated body of the KÖGEL tipper is ideal for transporting hot asphalt, not only in road construction, but wherever precise and temperature-controlled material distribution is required. This ranges from roads to runways and car parks. The tipper body is lined with sheet metal and is easy to clean.

Bulk materials

The **KÖGEL TIPPER** body has a straight inner surface with a dirt-repellent front wall. This enables smooth material flow while tipping and reduces the adhesion of wet or sticky materials. KÖGEL also offers a sliding roof for the tipper trailer, which can be operated manually or electrically, to prevent dust and loss of load.

IDEAL SOLUTIONS FOR EXTREME ENVIRONMENTS

Tipper trailers must satisfy high standards. Only with a long lifespan and low operating costs does the investment pay off. This is made possible by high-quality materials, effective corrosion protection and maintenance-friendly design. The perfect balance between tare weight and payload is essential for maximum economy and sustainability.

The **KÖGEL TIPPER TRAILER** and the **KÖGEL ASPHALT TIPPER TRAILER** meet these needs, delivering high profitability and lasting quality in all areas of the construction industry.
